

ALLAN GRAY SUPERANNUATION AND RETIREMENT

MANAGED ACCOUNT MODEL PORTFOLIO GUIDE

30 SEPTEMBER 2022

IMPORTANT INFORMATION

This document is part of the OneVue Managed Account Product Disclosure Statement (PDS). This document must be read together with the PDS, which contains essential information about the OneVue Managed Account (Managed Account).

None of the Investment Managers named herein or any of their associates and subsidiaries has prepared this document, or is responsible for its contents.

No one described in this document assures or guarantees the success of your investment, any particular Managed Account Model Portfolio, the repayment of capital or a particular rate of return.

Nothing in this document should be taken as the provision of personal financial advice by either the Responsible Entity, any Investment Manager named herein, or any of their representatives, associates or subsidiaries, because none of these parties are aware of your investment objectives, financial position or particular needs. No action should be taken without your consideration of your particular financial circumstances and investment objectives.

The performance of each Managed Account Model Portfolio is dependent on the performance of the underlying investments in the selected Managed Account Model Portfolios which can fall as well as rise in value, resulting in capital losses or capital profits. Investors should not take past performance as an indication of future performance. The general market and economic conditions that existed in the past could be different in the future and these differences could have significant impact on investment returns.

All of the Investment Managers have given and have not withdrawn their written consent to being named in this document as the Investment Manager in respect of the Managed Account Model Portfolios included in this Managed Account Model Portfolio Guide in the form and context in which they are included. Investment Managers do not make any other statements in this document.

The Investment Managers are responsible for managing the Managed Account Model Portfolios in accordance with the key investment parameters set out in this Managed Account Model Portfolio Guide. They do not hold any assets on your behalf nor are they responsible for executing trading in the underlying investments.

The Investment Managers are the owners of all intellectual property in the selection process used to determine each Managed Account Model Portfolio and that intellectual property must not be disclosed or used other than for the purpose of obtaining advice on, or for the administration, monitoring, management, and the satisfaction of legal obligations in respect of, the investor's account.

From time to time new Managed Account Model Portfolios and Investment Managers will be added. You can find this information on the website shown below.

INVESTMENT MANAGERS

Dynamic Asset Consulting (Dynamic Asset) is a specialist investment management company that has developed and manages various "goals based" managed portfolios to meet the needs of advice firms and their clients.

Dynamic Asset portfolios are actively managed portfolios targeting specific risk-return outcomes. The differentiated portfolios allow for different timeframes, liquidity, return targets or risk management requirements. The strategic nature of the portfolios allows advisers to blend them in any way to match portfolios to specific client goals, helping advisers meet their best interest needs by delivering better, more relevant investment outcomes for members.

Dynamic Asset believes that as the world is constantly changing and the future is uncertain, a dynamic asset allocation approach is the most appropriate way to properly manage investments and risk. Dynamic Asset constructs portfolios that target a 'real rate of return' – after fees and inflation - using a diversified approach aimed at reducing volatility by placing an emphasis on capital preservation.

The range of portfolios form part of a complete off-the-shelf managed account solution across both wealth and super to enable adviser business efficiency, growth and scalability.

DNR Capital is an Australian investment management company that delivers client-focused, quality, investment solutions to institutions, advisers and individual investors.

Founded in 2001, DNR Capital specialises in the delivery of individually and separately managed accounts in the Australian market and aims to deliver investment outperformance to investors.

DNR Capital is a signatory to the United Nations Principles for Responsible Investment.

JBWere provides a wide range of, advisory and wealth management services to a substantial and diversified client base. It seeks to be the adviser of choice for clients throughout Australasia and, through its financial networks, provide leading capabilities that extend to financial markets globally.

JBWere provides extensive services, across every major asset class, to many private clients throughout Australia and New Zealand.

The principles of integrity and dedicated client service, astute market knowledge and a commitment to excellence are ingrained in the firm's culture. These values, combined with quality research and investment products, make JBWere a trusted partner for many investors.

Lonsec

C DNRCapital

.JBWere

Lonsec Investment Solutions Pty (ABN 95 608 837 583) is a corporate authorised representative (CAR 1236821) of Lonsec Research Pty Ltd (ABN 11 151 658 561, AFSL 421 445). Lonsec believes in active management and seeks to add value by investing in a concentrated portfolio of quality companies trading at a reasonable price (QARP). The key elements of Lonsec's investment philosophy are:

- quality stocks at a reasonable price
- concentrated portfolios
- low turnover, and
- strong risk management.

Founded in 1995, **Private Portfolio Managers Pty Limited (PPM)**, is a privately owned boutique investment manager with a well-established track record of constructing concentrated Australian and global equity portfolios for our clients and their financial advisers. Our investment objective is to grow our clients' portfolios over the long term using a disciplined & well researched investment process which seeks protection of capital with risk assessed tax effective returns. PPM offers individually managed account and separately managed account investment solutions across a number of broad investment strategies including balanced, income and growth style portfolios.

YX Ball Financial offers exposure to some of Australia's leading active managers working in collaboration with external investment committee members and asset consultants to bring additional value to the investment process.

JBWere Intermediary Income

Benchmark	S&P/ASX 200 Accumulation Index
Investment universe	Selected shares researched by JBWere listed in the S&P/ASX 200 Accumulation Index.
Investment objectives	 To enhance the value of investment capital by generating combined capital and income returns that exceed the rate of inflation over the longer term (5 years plus). To produce a consistent income stream, with a dividend yield greater than that of the S&P/ASX 200 Accumulation Index. To deliver enhanced after-tax returns relative to the benchmark by maintaining a franking level higher than the S&P/ASX 200 Accumulation Index and implementing a low turnover of portfolio Shares.
Investment strategy	Share selection and portfolio construction aims to be defensive in nature, aiming to deliver a low-beta exposure (Beta<1) to the Australian market (that is a portfolio which is less volatile than the benchmark).
	Reflecting the defensive nature and focus on delivering a consistent income stream, the portfolio is likely to have a greater component of income relative to capital gain in comparison to the S&P/ASX 200 Accumulation Index.
Designed for investors who	Want access to consistent income streams with a portfolio yield greater than the benchmark.
Number of shares	15 - 25
Asset allocation ranges	ASX Listed Securities90 - 98%Cash2* - 10%* Cash may fall below this level but will be restored on rebalancing
Defensive vs growth asset allocation range	Defensive 0 - 10% Growth 90 - 100%
Single share limits	Individual share holdings limited to 10% of company's issued capital.
Minimum investment horizon	At least 5 years
Standard risk measure	High
Investment management fee	0.55% p.a.
Minimum investment	\$25,000

JBWere Listed Fixed Income

Benchmark	Benchmark unaware
Investment universe	ASX Listed Securities Selected ASX listed bonds, hybrids and convertible notes/bonds researched by JBWere. While the portfolio aims to be fully invested at all times, a short-term allocation to cash may occur.
Investment objectives	 Within the investable universe of ASX listed fixed income instruments, to construct a relatively defensive portfolio that aims to: Have a capital preservation focus and one exhibiting a low level of capital and earnings volatility Adequately reward the investor for the credit, market and liquidity risk assumed Provide a steady and secure income stream Provide a solid absolute return that represents a premium to rates earned on term deposits Be liquid enough to ensure sufficient investing flexibility.
Investment strategy	 To ensure the best opportunity to meet the portfolio's objectives, JBWere focuses on the following investment selection criteria: Investment grade credit quality The expected level and reliability of coupon payments Adequacy of the trading margin The liquidity of the issue The visibility of maturity or a value enhancing event (step-up, reset) that would likely trigger capital appreciation. Reflective of its focus as a defensive investment the portfolio is not expected to be a heavily-traded portfolio. Moreover, the general approach is to hold instruments to maturity; however, portfolio changes will be made in response to developments including: Changes in JBWere's tactical view Adverse changes in the credit quality of individual issuers or instruments Redemptions Compelling relative value opportunities.
Designed for investors who	Are looking for a well-researched, transparent and defensive-orientated fixed income portfolio.
Number of instruments	Typically, 8 - 20
Asset allocation ranges	Bonds0 - 100%Hybrids0 - 100%Convertible notes/bonds0 - 25%Cash2* - 15%* Cash may fall below this User stored on rebalancing

Benchmark	S&P/ASX 200 Accumulation Index		
Investment universe	ASX 200 stocks		
Investment objectives	To deliver strong returns above benchmark, over the medium to long term, by investing in a diversified portfolio of "blue-chip" companies		
Investment strategy	Economic and industry fundamentals are given equal weight to company fundamentals. Once desired industries are identified, then quality companies trading at a reasonable price are selected within each industry. Portfolios are concentrated between 10-25 stocks and turnover is low. Risks are mitigated by portfolio rules, risk metrics, team experience and stock filters		
Designed for investors who want	 Capital growth A reasonable yield A portfolio of large cap companies To invest for at least 3 years 		
Number of instruments	10-25		
Asset allocation ranges	ASX Listed Securities95 – 98%Cash2* – 10%* Cash may fall below this level but will be restored on rebalancing		
Single instrument limits	Maximum 15% exposure to a single company Minimum diversification of 8 GICS industries		
Minimum investment horizon	3 - 5 years		
Standard risk measure	High		
Investment management fee	0.55% p.a.		
Minimum investment	\$25,000		

Benchmark	MSCI World Developed ex Australia (AUD)		
Investment universe	Securities listed on the major global equity markets (US, UK, Europe, Japan and Hong Kong and other developed OECD countries).		
Investment objectives	PPM Global Equities Growth separately managed account seeks to achieve a total return of 10 - 12% over a long term cycle.		
Investment strategy	PPM Global Equities Growth model is an actively managed, concentrated portfolio of global equities. The investment strategy is to identify global companies and industries that will benefit from emerging investment themes that offer superior earnings growth prospects over a 5 year term. The separately managed account is constructed without consideration for index weighting and with a strong focus on preserving capital and effectively managing tax outcomes.		
Designed for investors who	 The PPM Global Equities Growth separately managed account is designed for investors who: Require exposure to a portfolio of quality global companies; Seek long term investment growth in a tax effective manner; and Have long-term investment horizon of at least five years and accept the risk of price fluctuations during that period. 		
Risks	 In addition to the risks outlined in the IDPS Guide, the following risks should be considered for investing in this international portfolio: Currency risk – The offshore investments held in the portfolio are exposed to risks associated with movements in foreign exchange rates. The portfolio will not be hedged. Therefore, investors will be subject to the impact of movements in foreign currency exchange rates. Concentration risk – The portfolio is a relatively concentrated portfolio of generally between 20-25 companies. The portfolio could be exposed to a particular sector that may be subject to problems or demand/supply imbalances. On some occasions, the portfolio could hold a substantial position in a particular company (as much as 10%). As a consequence, the portfolio therefore may differ from and could underperform or outperform broad cap equity benchmarks over time.

Benchmark	 A composite index comprising: 15% S&P ASX 200 Accumulation Index 10% MSCI World (ex Australia) Accumulation Index 10% S&P ASX 200 A-REITS Accumulation Index 65% Custodian Cash Rate 		
Investment universe	ASX Listed Securities and cash (no derivatives or IPOs)		
Investment objective	To provide competitive total returns from income and growth from a portfolio of assets which are diversified across Australian and international shares, property securities, cash and fixed interest. The aim is to outperform the multi-sector conservative benchmark consistently over rolling 5 year periods.		
Investment strategy	The portfolio invests in ASX Listed Securities as well as fixed interest and cash to provide asset allocation to the following asset classes:		
	 Australian equities – via a direct portfolio of shares and exchange traded funds using inputs from an expert investment panel including leading researchers and fund managers International equities – via a portfolio international equities – via a portfolio of specialist exchange traded funds Property securities - via a portfolio of specialist exchange traded funds Cash & fixed interest. 		
	The asset allocation across the four asset classes is then managed using the Proactive Portfolios asset allocation process. From time to time significant shifts in asset allocation will be made based on the assessment of where to find the best value using a three to five-year planning horizon. The operating ranges for asset allocation are very wide and allow for very low or very high allocations to equities to allow the best overall strategy to be used in the interests of investors where market prices have move to extreme levels.		
Designed for investors who	Want to achieve moderate medium to longer term returns with lower year to year volatility in returns

Investment objectives	To outperform the Small Or years) by 2 - 3%	rdinaries Accumulation Index over the medium to longer term (three to five			
Investment strategy	The separately managed account strategy is to identify, and invest in, mispriced listed companies using a fundamental "bottom-up" stock picking approach. Watershed recognises that investment markets are regularly inefficient with regard to the appropriate market pricing of securities, particularly within the market for smaller to mid-cap listed companies. Generally, companies outside the S&P/ASX 100 are not as comprehensively researched as the larger companies. Further, given that many of these smaller companies are typically at the earlier stages of their growth cycle (i.e. emerging growth companies), they are often not fully understood nor appropriately priced by the market relative to their true growth prospects. Watershed's investment philosophy recognises the existence of pricing inefficiencies, and is focused on conducting in-depth research to identify, appropriately value, and invest in undervalued companies. All investments must offer a clear path (i.e. catalyst) for a positive re-rating to occur, and thereby support favourable investment outcomes.				
Designed for investors who	Are seeking capital growth	with a medium to longer term investment horizon (3 - 5 years).

Watershed Australian Share

Benchmark	ASX 200 Accumulation Index
Investment universe	 Cash S&P/ASX 200 ASX-listed exchange traded funds
Investment objectives	The main objective of the Australian Share Portfolio is to provide market-leading returns over the medium to long term from a concentrated portfolio of Australian "blue chip" shares, aiming to deliver an investment return (after fees) that outperforms the S&P/ASX200 Accumulation Index over a rolling three-year period.
Investment strategy	The manager believes that macro-economic cycles drive the majority of share price performance, both short and long term. Recognising that economic cycles have major implications on the volatility of corporate earnings across industries, it seeks to exploit these cycles to achieve higher than index returns over time.
	Rigorous fundamental analysis is undertaken on businesses to ensure that the portfolio holds high quality investments and companies, shifting the allocation between asset classes and sectors (early, mid or late cycle cyclicals and defensive sectors) given the current and expected economic environment.
	Watershed also believe that short term market sentiment often creates divergence between valuations and market pricing and looks to exploit this by actively managing overall market exposure and cash weight.
Designed for investors who	Seek a concentrated portfolio of Australian shares offering medium to long term capital growth and some tax-effective income from their investments.
Number of securities	15 - 25
Asset allocation ranges	ASX Listed Securities80 - 98%Cash2* - 30%* Cash may fall below this level but will be restored on rebalancing
Single share limits	Index weight +6%
Minimum investment horizon	At least 5 years
Standard risk measure	Very high
Investment management fee	0.66% p.a.
Minimum investment	\$25,000

Watershed Income

Benchmark	UBS Bank Bill Index
Investment universe	Cash ASX-listed corporate bonds exchange traded funds ASX-listed fixed interest exchange traded funds ASX hybrid and debt securities
Investment objectives	To generate an income return of 2% above the official cash rate (after fees) from a concentrated portfolio of listed bond, hybrid and debt securities. The portfolio should be viewed as defensive with some capital volatility and is not expected to generate any long term capital growth.
Investment strategy	Hybrid securities are higher-yielding investments, generally paying regular income to investors via a defined margin above the prevailing bank bill rate. They are particularly attractive to investors seeking superior yields than available from a cash account or term deposit in a low interest rate environment. The portfolio has a bias towards listed bond exposure and highly rated floating or variable rate securities to minimise interest rate risk, and investment grade issuers.
	The investment committee undertakes the following steps when constructing the portfolio:
	 Review the current macro environment looking at where positioning in the interest rate cycle and other factors such as global credit spreads Evaluate key details of the issue to ensure it meets the investment criteria evaluating factors such as yield, credit quality of issuer, conversion details, franking, maturity date Undertake thorough analysis to isolate the securities that offer the best risk/return profiles Construct the portfolio then constantly monitor and formally review on a weekly and monthly basis.
Designed for investors who	Seek higher yields than cash and term deposits and are comfortable with some capital volatility.
Number of securities	Typically between - 15 - 30
Asset allocation ranges	No restrictions within investment universe
Single share limits	Maximum of 15% of portfolio value
Minimum investment horizon	3 - 5 years
Standard risk measure	Medium
Investment management fee	0.44% p.a.
Minimum investment	\$25,000
